Company Profile

BIPIANO BD

(ALL KINDS OF APPARELS SOURCING AND SOLUTION)

Introduction

BIPIANO BD provides a one-stop solution for hassle-free sourcing and buying of ready-made garment (RMG) products in Bangladesh. Delivering reliable, efficient, and high-quality service is at the core of everything we do. We believe that quality means complete customer satisfaction in every aspect of the product—this principle forms the foundation of our company's success.

Over the years, Bangladesh's garments industry has experienced significant growth, creating a wide range of opportunities in global sourcing. At BIPIANO BD, we leverage our deep market knowledge, strong network, and industry expertise to help our clients fully capitalize on these opportunities.

Founded in 2005, BIPIANO BD operates as a sourcing and buying house specializing in ready-made garments and fashion technology. Our team is a pool of experienced professionals dedicated to maintaining our philosophy of delivering on-time quality. Our fully equipped facilities support sourcing, merchandising, quality control, and product development processes.

In today's fast-changing business environment, we understand that being truly customer-focused requires speed, transparency, and efficiency. BIPIANO BD is committed to providing fast response times in information flow, sampling, and production lead times.

To achieve this, we have implemented a real-time online communication system that connects buyers and suppliers seamlessly. This system covers everything from style presentation and sample requests to price quotations, production approvals, and shipment tracking—significantly reducing lead times and operational costs.

We are also committed to ethical business practices. BIPIANO BD strictly discourages child labor and actively supports environmental protection initiatives.

Services:

Our primary function as buying agents is to find Suppliers according to your needs in terms of your price range, Type of product and finally the quality of the product. Suppliers Vary from product to product and between various price ranges. We are committed to find the supplier that best caters to your Need. We here at are committed at making sure that your Interests are protected in all aspects of the process.

Monitoring:

Once we sort out an ideal supplier for you our Next function is to ensure that the production process runs Smoothly. We monitor our suppliers constantly to ensure timely Shipment and locate any bottlenecks in the process. Monitoring Isa critical function in terms of reduction of lead time. With constant Surveillance we can also provide you with instant feedbacks.

Sourcing & Operations:

Once one order is confirmed with ultimate customer we use to finalize our sourcing units and fix up total operations planning on works flow chart under critical path and time and action (TNA) operations follow up system with respective responsible units and persons to success the total Activitiesin time and committed delivery meet up with customers

Quality Control System:

All buyers require good quality and with our quality control division we ensure that the buyers' Requirements are met. Quality cannot be sacrificed at any cost and thus we believe that all finished products should meet the Basic requirements of the buyer and to avoid incurring extra Costs.

We have a proper implementation of required quality System with manpower instruments.

Sampling:

1. Collecting customer's requirement of fabric and style.
2. Identifying and selection of appropriate source.
3. Preliminary screening by inspection and testing.
4. Forwarding samples to the customers and receiving Feedback.

Pricing:

1. Receiving and verifying the quotations of suppliers by Studying their suitability both in terms of quality and Capacity to meet contractual requirements.
2. Negotiation and finalization of price.

Order Progress Process:

On receipt of orders based on above, discussing with suppliers on process planning, preparation of critical path by highlighting Critical stages involved.

Weekly Progress Report:

Meeting with Merchandiser, Quality Controller and Logistic staff will be held every Saturday and status will be e-mailed to Customers on every Monday. This will enable all the customers to verify their order progress.

Sample Trajectory:

Different types of samples like prototype, pre-production, photo Sample etc. will be strictly followed up.

Quality Assurance:

1. Testing over all basic parameters for each dye lot of the Fabric.
2. Arranging and carry out fabric, size set, in-line and final Inspection.
